

Client: Sri Lank Police Department - Island-wide Electronic Data Management System

Sri Lanka Police Data Management System connects all 425 island wide police stations in Sri Lanka.. Our data management system optimises all internal data management processes which can be used for statistical purposes.

The screenshot displays the web interface for the Sri Lanka Police - Data Management System. At the top left is the Sri Lanka Police emblem. The main header reads "Sri Lanka Police - Data Management System". Below this is a "User Login" section with input fields for "User Name" and "Password", a language selector (English, Sinhala, Tamil), and a "Login" button. To the right is a photograph of police officers on motorcycles at night, with the text "Vigilant throughout the day" overlaid. Below the login section are three columns: "Our Vision" (Towards a Peaceful environment to live with confidence, without fear of Crime and Violence), "Our Mission" (Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none - equity to all), and "Definition of Police" (The civil force of a national or local government, responsible for the prevention and detection of crime and the maintenance of public order). At the bottom, a footer lists core values: P - Politeness | O - Obedience | L - Loyalty | I - Intelligence | C - Courtesy | E - Efficiency, and credits the developer as "Developed By : eLogic Lanka (Pvt) Ltd".

Training

Part of our deployment involved training over 500+ senior & junior Police officers islandwide on our Data Management System. and SMS complaints system.
