CAR PARK MANAGEMENT SYSTEM
AT SHANGRI-LA

Shangri-La Hotels & Resorts Ltd purchased our fully automated gated Smart Car parking management system including vehicle guidance system Valet car parking system with Automatic Number Plate dRecognition technology. In total the system manages over 1000 car parking spaces with 1-2 employess.

Our system integrates seamlessly with Security and Parking systems components and devices such as Access Control, RFID Readers, ANPR (Automatic Number Plate Recognition), Variable Message Signs and Barriers and Payment Services.

We provided a customer mobile application which allows Shangri-La clients to view all the vacant and occupied parking slots in the car park, book a parking space, view parking duration, the parking fee and pay for parking via cash, credit card or mobile cash.

Hotel management can receive payments through a cash collecting mobile application. Cloud computing architecture with data synchronization is the base structure of this system. Cloud architecture gives to the system a high efficient data access to the user with disaster recovery facilities to the Administrator. This is Sri Lanka's first ever large-scale smart car parking guidance and smart payment system.

Our vehicle guidance systems, automated payment modules, ANPR, automated gating, customer mobile app provides a customer experience your clients will love.
